

## NEW NETWORK PLATFORM ARCHITECTURE:

# CAMPUS & BRANCH

Nowadays people want to use their own smart mobile devices in and out of the office, for both personal and business use. These devices rely on wireless as their primary means of network access. As a result, the main technology for business premise networks is evolving from wired to wireless. And it is posing unique, new challenges for IT staff who need to provision, secure and manage a diverse set of mobile devices, whose users expect and require wireless connectivity to be equal to wired.

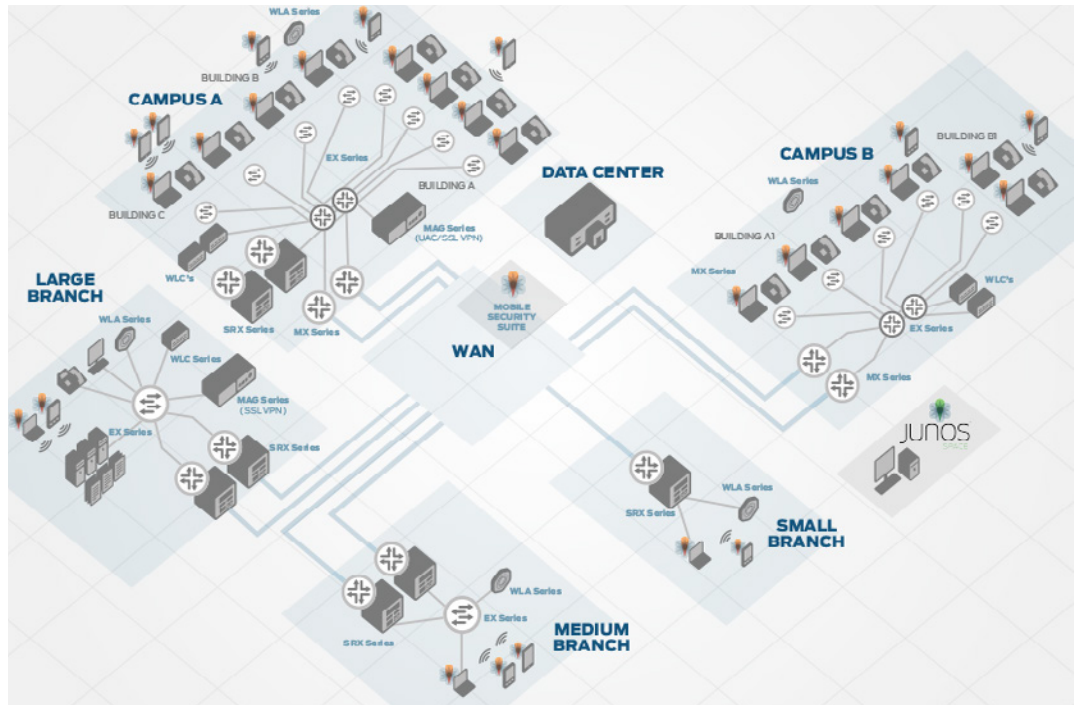

Juniper addresses the campus and branch domain, where end-users and devices are connected to an organization's network by offering solutions that simplify security and simplify the network at the same time. And Juniper's solutions are highly available featuring continuous operation and the ability for In Service Software Upgrades (ISSU), meaning no loss of productivity for scheduled or unscheduled downtimes.

Juniper offers solutions to help an enterprise evolve to utilizing a single, general-purpose, application-agnostic network that's truly

capable of securing any device and any user, no matter when, where or how they connect. Our unique security, switching and wireless products deliver the experience of being simply connected.

Juniper's campus and branch domain solutions help organizations easily scale security, access and wireless while keeping costs at bay.

# CAMPUS AND BRANCH ARCHITECTURE

## VALUE PROPOSITIONS AND DIFFERENTIATORS

### VALUE PROPOSITIONS

- Highly resilient
- Coordinated security per device and user
- Wired & wireless performance at scale

### DIFFERENTIATORS

- No single point of failure with fewer devices and tiers to manage.
- Consistent and comprehensive enforcement of access and security policies for users, regardless of device or location.
- Support for high bandwidth applications with the best QoS. Wired-like performance for wireless access.

## SOLUTION PORTFOLIO

### EX SERIES ETHERNET SWITCHES

EX Series Ethernet Switches deliver high-performance solutions to meet the needs of today's converged branch, office and campus networks.

### WLAN SERIES

Juniper Networks wireless LAN (WLAN) solutions provide secure, scalable connectivity for mobile users and all their Wi-Fi enabled devices.

### SRX SERIES SERVICES GATEWAYS

SRX gateways consolidate flexible network switching, a network router, QoS and advanced security options to support highly responsive and secure service operations.

### JUNOS PULSE

The Junos® Pulse Mobile Security Suite protects smartphones from viruses, malware, loss or theft, physical compromise and other threats and it supports major mobile operating systems.

### MX SERIES 3D UNIVERSAL EDGE ETHERNET ROUTERS

MX Series 3D Universal Edge Routers are high-performance routers capable of supporting demanding campus cores.

### JUNOS SPACE

Junos® Space provides a suite of software tools for managing Juniper's routing, switching and security portfolios.
