

# M-395i

Cutting edge, high performance hardware for medium-sized organizations

M-395i

## M-395i Overview

The Network Box M-395i hardware appliance is designed to offer medium-sized organizations fully comprehensive cyber protection.

Processor	64bit, 3.4GHz, 4 physical cores
RAM	2 x 8GB, 1333MHz DDR3
Storage	2TB 3.5" HDD
Networking	<b>Standard:</b> 6 x 1Gb RJ45  <b>Optional:</b> 2 x 10 Gb: 10 GBASE - SR 10 GBASE - T
MTBF	7.8 years
Power Supply	220w
Chassis	1u rackmount – ¾ depth
I/O Interface	1 x reset button 1 x RJ-45 Management Console 2 x USB 2.0
Physical Dimensions	431mm(w) x 44mm(h) x 415mm(d)
Weight	8.2kg
Approvals/ Compliance	CE emission, UL, FCC Class A, RoHS

Firewall	<b>5,170 Mb/s</b> 18 Engines Proxy, Packet Filtering, Stateful Packet Inspection
IDS/IDP	<b>3,550 Mb/s (IDS Throughput)</b> <b>1,030 Mb/s (IPS Throughput)</b> 3 Engines 16,000+ Signatures
VPN	<b>1,220 Mb/s</b> IPSEC, PPTP, SSL
Anti-Spam	<b>53,100 messages/hour</b> 25 Engines 30.7million+ Signatures
Anti-Malware	<b>410 Mb/s</b> <b>940 web requests/s</b> 16 Engines 11.1million+ Signatures
Content Filtering	<b>280 Mb/s</b> <b>350 web requests/s</b> 15 Engines 7.7million+ Signatures
WAF Throughput	<b>1,000 Mb/s</b> <b>4,390 web requests/s</b>
Anti-DDoS	Real-time automated fingerprinting, millisecond response
IPv4 to IPv6 Bridging	Incoming/Outgoing Protocol Translation
PUSH Updates	Updates automatically delivered and installed in an average time of less than 45 Seconds

Benchmarking was conducted with full scanning capabilities enabled to simulate real-world conditions, these include: URL Categorization, Anti-Malware, Anti-Spam, and more.
